INTRODUCTION

In this document you'll find information on all the changes included in this update. We're incredibly excited for you to see what we've done, and we hope you enjoy it.

SCOTT BROOKS, LEAD PROGRAMMER

"My favorite part of working on 1.3 was being able to spend some time on the path finding, a long standing issue in the Infinity Engine, and make some big improvements."

DEE PENNYWAY, ASSISTANT PRODUCER

"It's exciting to finally show this to everyone. 1.3 is full of blow-the-doors-off moments; not just the hundreds of bugs that we've fixed, but the changes to the engine that make it *just work better*. I'm especially fond of the romance import feature; I think that'll make modders very happy."

JEFF PAYNE, QUALITY ASSURANCE

"I loved being able to have the team and platforms available to do 6 player multiplayer testing using all of our supported platforms (PC, Mac, iOS, Android and Linux) simultaneously with testers spread across 4+ time zones. We're excited to bring that improved multiplayer experience to our players!"

RICHARD HILTON, QUALITY ASSURANCE

"Helping get so many forum reports raised and testing their fixes was hugely enjoyable. I'd like players to experience BGII:EE without NPCs who misbehave."

MIKE WELLMAN, QUALITY ASSURANCE

"The feeling of getting rid of bugs and exploits that had been in the game since it was release was immensely satisfying. Working with people as dedicated to the fans and the quality of the game as I was made it even better."

ALEX MOLZAHN, TRAILER COORDINATOR

Working with everyone at Beamdog and seeing their dedication and passion for the franchises is inspiring and pushes everyone to work harder to complete our goals. I'm sure fans will notice the diligence and devotion we give to the games with the 1.3 patch and future titles.

LORNE LEDGER, TECHNICAL DESIGNER

"I am really proud of the work we have done on the 1.3 patch for BGII:EE to improve Multiplayer on all platforms. I look forward to our continued success in pleasing the fans with such a beloved game."

PART 1: ENHANCEMENTS AND FEATURES

IMPROVED PATHFINDING

Party members now wait for each other to bypass obstacles, rather than immediately searching for another route to their destination. This results in much fewer instances of characters wandering off to the far corners of the map, and generally keeps the party closer together while traveling.

Party members will also move out of the way while attacking to allow allies to move toward enemies, enabling characters to take better advantage of reach weapons and keeping ranged characters from getting in the way of melee fighters during combat.

Enemies use their original behavior, looking for alternate routes when they encounter obstacles. For the clay golems in the starting dungeon, that alternate route may involve smashing goblins into paste when there's no way around them.

PATHFINDING AND NARROW CORRIDORS

In previous versions of the Infinity Engine, characters might occasionally “take the long way around” if another party member was in their direct path.

Baldur's Gate II: Enhanced Edition improves this behavior, so that no matter how narrow the corridor, your party will walk in single-file until they reach their destination.

FEWER PAUSE MESSAGES

Switching between game menus no longer prints Pause messages in the game's combat log. Pausing the game normally still displays Pause messages.

Pause messages now also display the date and time for the game's current progress, allowing tablet-users to see at a glance how long their journey has taken.

EFREET AND TINY GOLEM ANIMATIONS

Dormamus, the efreet encountered in *The Black Pits II* adventure, now uses a unique efreet animation.

The splitting Clay Golems also found in *The Black Pits II* now also split into smaller clay golems that use a new animation.

CLAY GOLEMS IN THE BLACK PITS II

Clay Golems encountered in the arena will split into several smaller golems when defeated. Clay golems found in *Shadows of Amn* do not share this dangerous trait.

ENABLE MULTIPLAYER BANTERS THROUGH BALDUR.INI

By default, NPC banters are disabled during multiplayer to maintain forward momentum for all players. Adding the following line to `baldur.ini` now enables banters for any NPCs controlled by the host during multiplayer:

```
'Multiplayer', 'Disable Banters', '0',
```

PRIEST ALIGNMENTS UPDATED

Cleric kits now allow alignments based on patron deity. Clerics with no kit can follow any stronghold whose patron deity is within one step of the cleric's alignment. Clerics in existing games are not affected by this change.

CLERICS AND ALIGNMENT

A priest can be any alignment within one step of his or her patron deity on either the Good-Evil axis or the Law-Chaos axis, but not both. For the cleric kits in *Baldur's Gate II: Enhanced Edition*, the allowed alignments are:

Lathander: Lawful Good, Neutral Good, Chaotic Good, True Neutral

Helm: Lawful Good, Lawful Neutral, True Neutral, Lawful Evil

Talos: Chaotic Neutral, Neutral Evil, Chaotic Evil

IMOEN REMAINS LOYAL, NO MATTER WHAT

Imoen always said she'd follow your character to Hell and back. Imoen now remains in the party no matter what the player's reputation is, although this will not stop her from complaining if the player's reputation is low.

Hexxat also remains loyal regardless of reputation, at least until the end of her quest in Dragomir's Tomb.

IMOEN AND LOW REPUTATION

Although Imoen will never leave you for having a bad reputation, she will still complain if your reputation is low. Keep your reputation high to keep Imoen happy!

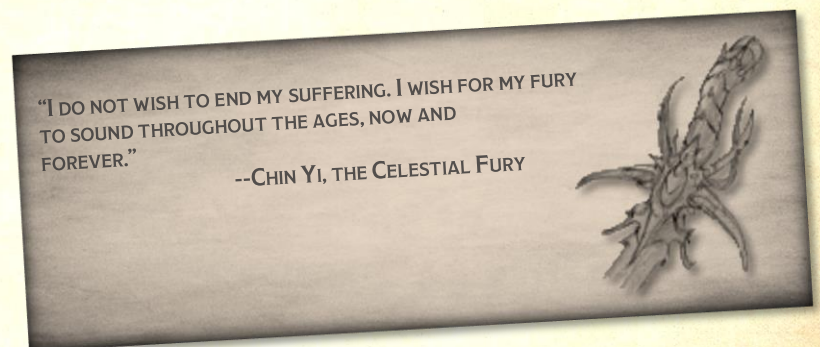

UPDATED EQUIPMENT: FOEBANE, BURNING EARTH, CELESTIAL FURY

The Foebane long swords now both deal their bonus damage consistently against the following enemy types, and their descriptions have been updated to match: undead, shapeshifters, demons, and devils.

The Burning Earth long sword now deals an additional point of fire damage with every successful attack, fitting both its name and its flaming appearance.

Additionally, the Celestial Fury +3 katana now features a unique and tragic history, which can be found in its item description.

MIRONDA NOW ADDS TRADEMEET TO THE WORLD MAP

When Mironda gives the quest "A new beer for Mironda", she now adds Trademeet to the player's world map, allowing the player to travel to the quest location if they have never been there before.

FASTER BEARS

All bears in the game now move as quickly as normal humans, making them both more believable and more challenging when faced in the wild.

ROMANCES REMEMBERED FROM BALDUR'S GATE

When you import a saved character from Baldur's Gate: Enhanced Edition to the beginning of Shadows of Amn, your romance status with Dorn, Neera, or Rasaad will now be carried over. Find your lost companion in Athkatla or the surrounding region and your relationship will pick up right where it left off.

IMPORTING VARIABLES IN MODS

Got an idea for a mod that spans across multiple games? Simply add the variables you wish to import to VARIMPRT.2da; any imported saved games will carry over your variables into a new game.

MALAAQ NOW GRANTS IMPORTED WEAPONS

Imported characters now have a way to retrieve one of their weapons from Baldur's Gate in the starting dungeon. Simply visit the imprisoned genie and give him the freedom he seeks, and you will receive a weapon imported from your Baldur's Gate game. If you have more than one weapon from the list to the right, the top-most weapon will be carried over.

Starting with a new character? No problem. The genie will still give you a weapon appropriate for your character based on your class and weapon proficiencies.

This replaces the Sword of Chaos +2 that the genie previously possessed, which has been moved to the Cambion just southeast of the genie's planar prison.

IMPROVED SUMMONED ELEMENTALS

Summoned fire, earth, and air elementals now boast improved Hit Dice and Strength at higher levels, creating a much clearer distinction between Lesser Elementals and Greater Elementals.

BLINDED ENEMIES WANDER

Enemies affected by Blindness now wander the battlefield, searching for available targets. Blinded friendly creatures remain in the player's control.

SPELLCASTING MADE SIMPLER

Switching from an arcane caster to a divine caster while viewing the Mage Spells screen now switches automatically to the Priest Spells screen, allowing you to quickly memorize spells for all your party members.

In addition, losing spell slots no longer clears the selections for those spells, meaning that when you recover from Level Drain, all it takes is a single Rest and your spellcaster will be back in business.

Quick Spell slots are also now remembered after returning to your natural form at the end of polymorph effects, so your shapeshifting druid will be better able to switch from tearing enemies apart with her claws to blasting them away with spells.

RECOVERING FROM LEVEL DRAIN

When your character is struck by a vampire's attack, their level will be reduced. To recover your lost level, and restore your missing spell slots, have your cleric or a licensed priest cast a Restoration spell. Lost spell slots will be displayed in gray on the spellbook screen until

IMPROVED CHARACTER CREATION

A "Pre-Generate Character" button has been added in the Single Player menu, allowing you to create characters and export them without starting a new game. Use this to plan future play-throughs or to generate characters for use in multiplayer.

In addition, when you press "Store" on the Abilities step in character creation, any unspent ability points will also be stored and ready for distribution when you press "Recall".

Your rolled abilities are now also remembered if you return to the Abilities screen later in the character creation process. (Returning to the beginning of character creation clears ability rolls as it did before.)

IMPROVED INVENTORY MANAGEMENT

The Quick Loot bar now combines stackable items automatically when looted from the ground, and correctly displays usability tints for items you find. Using Quick Loot also no longer requires characters to walk to the items being looted, making the post-combat looting process much faster.

Wooden Stakes also now stack in groups of up to ten, saving precious space in inventory for the items you'll inevitably find in that vampire's lair.

QUICK LOOT

The red gem button on the main gameplay screen opens a Quick Loot bar showing all of the items on the ground nearby. Clicking on items from this bar instantly retrieves them, stacking any duplicate items and making the post-combat clean-up a much smoother experience.

CREATE FULLY CHARGED ITEMS IN DEBUG MODE WITH THE CLUA CONSOLE

Items spawned using the console command `CreateItem()` are now created with the item's maximum number of charges, unless an alternate number is entered.
